

March 16, 1999

Dear Dr. Henney:

1063 '99 MAR 23 A9:56

I am writing to express my concern regarding the proliferation of genetically engineered foods in the American diet. It should be the consumer's fundamental right to know the content of the item they are purchasing/eating. To this end, I strongly urge that the FDA require labeling for all genetically engineered foods.

Thank you.

Sincerely,

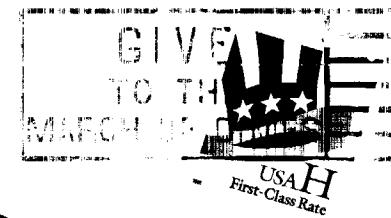

Mary Beccelia
